Advantages

For maximum efficiency and stability, we custom build our Players. It is based on well known INTEL NUC hardware and is made to last many years. We only use professional type computers from renowned brands and manufacturers. Operating system is based on Windows 10 Enterprise LTSC. This means that the updates are limited and only the minimum applications are installed. This ensure that our CMS runs smoothly and limits potential issues that could impact content playing.

Our devices are pre-configured and Plug&Play. easyCMS application is pre-installed and activated. For support purposes, TeamViewer is installed and activated on the device. This can allow our team to access it in case of emergency. This can be used to control an LED Display remotely (monitoring, brightness,...)

LED Display Support

Our Windows Media Players are compatible with LED display control systems. You can use them with any LED display brand, size or resolution. By default, we include Novastar LCT but on request we can change it for Colorlight, Zdec, Linsn or the one of your choice.

Applications

- Indoor digital advertising screens
- Hospitality and hotels digital signage
- Corporate digital signage solutions
- Restaurant digital signage
- Digital menu boards
- Digital signage for schools
- Retail signage displays
